Novaclime

Product Sheet

Linear Grille

Grilles

Novaclime linear grilles are the ideal ventilation solution for modern spaces with their aesthetic designs and homogeneous air distribution.

SKU
CMN7KDKL

General Features

- Aesthetic and modern design
- Homogeneous air distribution
- Different color and size options
- Suitable for ceiling and wall applications
- High quality material

Installation Type

- Clean the surface where the grille will be mounted.
- Prepare the necessary mounting hardware.
- Secure the grille to the surface.
- Connect to the air duct.
- Check the settings if necessary.

Surface Finish

- Electrostatic powder coating
- Anodizing
- Oven paint
- Chrome plating

Accessories

- Mounting clamps
- Connection elements
- Air deflectors
- Damper control accessories

Detailed Content

What is a Linear Grille?

Linear grilles are long, straight-line elements used in ventilation systems to direct and distribute airflow. Thanks to their aesthetic appearance and high performance, they are frequently preferred in modern interior designs. As Novaclime, we offer high-quality linear grille solutions suitable for different needs.

Advantages of Linear Grilles

Linear grilles provide a more homogeneous air distribution compared to traditional grilles. In this way, equal temperature and air quality are achieved in every corner of the environment. In addition, thanks to their linear designs, they integrate with the architecture and offer an aesthetic appearance. They can adapt to all kinds of spaces with different color and size options.

Novaclime Linear Grille Types

Novaclime offers various linear grille models for different applications. Adjustable blade linear grilles allow the airflow to be adjusted in the desired direction. Fixed blade linear grilles, on the other hand, offer a more stable and controlled air distribution. In addition, we can produce unique solutions for your projects with our specially designed linear grilles. You can contact our expert team to determine the most suitable linear grille model for your needs.

Linear Grille Application Areas

Linear grilles are widely used in offices, shopping malls, hotels, hospitals and many other commercial and industrial areas. Linear grilles, which are suitable for both ceiling and wall applications, can be easily integrated into all kinds of spaces with different mounting options. Novaclime linear grilles increase the efficiency of your ventilation systems thanks to their high performance and long-lasting structures.
