Novaclime

Product Sheet

Outdoor Air Louver

Louvers

Novaclime outdoor air louvers provide clean air intake in industrial ventilation systems and prevent external factors. Durable and long-lasting.

SKU

CMN7FR2F

General Features

- Durable and long-lasting structure
- Easy installation and maintenance
- Options in different sizes and designs
- High air permeability
- Protection against external factors

Installation Type

- Clean the surface to be installed.
- Secure the frame of the louver.
- Install the louver using the necessary connection elements.
- Make sure the louver is working properly.

Surface Finish

- Galvanized coating
- Electrostatic powder coating
- Anodized coating

Accessories

- Sealing gaskets
- Mounting brackets
- Protective grilles

Detailed Content

What is an Outdoor Air Louver?

Outdoor air louvers are an important component in ventilation systems that allow clean air to enter from the outside environment while preventing external factors such as rain, snow, and leaves from entering the system. Novaclime outdoor air louvers are designed to meet the ventilation needs of industrial facilities. Manufactured from durable materials, they offer long-lasting and reliable performance.

Usage Areas of Outdoor Air Louvers

Outdoor air louvers have a wide range of applications. They are an indispensable part of ventilation systems in many industrial and commercial buildings such as factories, warehouses, shopping malls, hospitals and office buildings. Novaclime outdoor air louvers are offered in different sizes and designs, providing solutions suitable for all kinds of needs. Especially in applications where energy efficiency is important, it increases system performance by optimizing air flow.

Advantages of Novaclime Outdoor Air Louvers

Novaclime outdoor air louvers are manufactured from high quality materials and are resistant to harsh weather conditions. Louvers manufactured using materials such as stainless steel or aluminum operate smoothly for many years. It also offers easy installation and maintenance. When choosing an outdoor air louver, it is important to choose a model that suits your building's needs and your ventilation system's requirements. Novaclime is happy to help you find the most suitable solution with its expert team.

Things to Consider When Choosing an Outdoor Air Louver

When choosing an outdoor air louver, it is important to pay attention to factors such as the dimensions of the louver, material quality, air permeability and ease of installation. In addition, the climatic conditions of the environment in which the louver is located should also be taken into consideration. For example, louvers made of materials resistant to corrosion should be preferred in coastal areas. Novaclime offers a variety of outdoor air louver options suitable for different climatic conditions.
