Novaclime

Product Sheet

Round Air Grille

Louvers

Novaclime round air grilles are ideal for directing airflow in industrial ventilation systems. They offer durable, efficient, and aesthetic solutions.

SKU
CMN7FDW0

General Features

- Provides homogeneous air distribution
- Aesthetic design
- Easy installation
- Durable material
- Energy efficiency
- Different size options

Installation Type

- Determine the area where the grille will be mounted.
- Prepare the necessary mounting parts.
- Secure the grille properly.
- Check the airflow direction.
- Make adjustments if necessary.

Surface Finish

- Paint coating
- Anodized coating
- Galvanized coating
- Stainless steel

Accessories

- Mounting parts
- Control accessories
- Connection elements

Detailed Content

What is a Round Air Grille?

Round air grilles are an important component used in ventilation systems to direct and control airflow. They are frequently preferred, especially in industrial environments where air distribution needs to be precisely adjusted. Novaclime's round air grilles are made of durable materials and offer long-lasting and reliable performance.

Advantages of Round Air Grilles

These grilles distribute airflow in a circular manner, providing a more homogeneous air distribution. This feature helps maintain temperature and humidity balance, especially in large areas. Additionally, their round design offers an aesthetic appearance and easily adapts to different interior designs. Novaclime round air grilles help increase energy efficiency and reduce operating costs.

Usage Areas of Round Air Grilles

Round air grilles are widely used in various industrial and commercial areas such as factories, warehouses, shopping malls, offices, and hospitals. As part of ventilation systems, they are used to improve indoor air quality and provide a comfortable environment. Novaclime's round air grilles are offered in different sizes and features, providing solutions suitable for all needs.

Novaclime Round Air Grille Features

The round air grilles we produce as Novaclime are made of high-quality materials and are long-lasting. They offer easy installation and adapt to your space with different color options. It allows you to precisely control the airflow and contributes to energy saving. Our products are manufactured in accordance with industrial standards and offer reliable and efficient performance.
