Novaclime

Product Sheet

Square Anemostat

Diffusers

Novaclime square anemostats provide homogeneous air flow and energy efficiency. Available in different sizes and designs, suitable for industrial and commercial use.

SKU
CMN7K2CH

General Features

- Homogeneous air distribution
- Adjustable vane options
- Aesthetic design
- Different size and model options
- Easy installation
- High quality material

Installation Type

- Clean the surface to be installed.
- Secure the mounting frame of the anemostat.
- Place the anemostat in the frame.
- If necessary, use fixing screws.
- Check and adjust the airflow.

Surface Finish

- Standard paint coating
- Electrostatic powder coating
- Anodized coating
- Stainless steel
- Baked paint

Accessories

- Mounting frames
- Connection elements
- Air direction vanes
- Dampers
- Plenum boxes

Detailed Content

What is a Square Anemostat?

Square anemostats are square-shaped diffusers used in ventilation systems to provide air distribution. These anemostats are ideal for providing homogeneous airflow, especially in large areas such as industrial facilities, offices, and shopping malls. Novaclime's square anemostats are made of high-quality materials and are long-lasting and durable.

Advantages of Square Anemostats

Square anemostats increase energy efficiency by optimizing airflow. Thanks to their adjustable vane structures, air direction can be easily adjusted, ensuring that an equal amount of air reaches every corner of the environment. In addition, their aesthetic designs give spaces a modern look. Novaclime square anemostats are available in different sizes and designs, thus offering solutions for all kinds of needs.

Square Anemostat Usage Areas

Square anemostats have a wide range of uses. They are frequently used in industrial facilities, production areas, warehouses, and laboratories. It is also a preferred ventilation solution in offices, meeting rooms, and waiting rooms. They also provide effective air distribution in crowded places such as shopping malls, hospitals, and schools. Novaclime offers square anemostats with different mounting options, making it easy to integrate into any space.

Novaclime Square Anemostat Types

Novaclime offers various square anemostat models for different needs. Adjustable vane, fixed vane, and custom-designed anemostats are available. There are also anemostat options made of different materials (aluminum, steel, plastic, etc.). Novaclime experts can help you choose the most suitable square anemostat model for your project.
