- Check that the cover opens and closes properly.

Surface Finish

- Galvanized coating
- Electrostatic powder coating
- Stainless steel
- Phosphate coating

Accessories

- Gaskets
- Screws
- Rivets
- Hinges

Detailed Content

What is a Square Honeycomb Access Door?

A square honeycomb access door is a product used to provide an access point in ventilation systems. It is usually found in air ducts or plenum boxes and allows easy access to the system. The square honeycomb pattern offers both an aesthetic appearance and helps optimize airflow.

Advantages of Square Honeycomb Access Door

These types of access doors provide great convenience, especially during maintenance and repair operations. In the event of any malfunction in the system, the relevant area can be accessed quickly by opening the cover. The square honeycomb design increases the strength of the cover while allowing air to pass through. In this way, the overall performance of the system is not adversely affected.

Usage Areas of Square Honeycomb Access Door

Square honeycomb access doors can be used in a wide range of areas from industrial facilities to office buildings, shopping malls to hospitals. Wherever there are ventilation systems, these covers allow easy intervention and necessary maintenance operations to be carried out. Especially in areas where hygiene is important, these covers are of great importance for regular cleaning and maintenance.

Novaclime Square Honeycomb Access Door Features

As Novaclime, our square honeycomb access doors are manufactured from high quality materials and are long lasting. Our covers in different sizes and features are designed to meet all kinds of needs. By prioritizing customer satisfaction, we aim to offer the best products.
